Bend, OR 97701  
[www.NADAC.com](http://www.NADAC.com)

# **NADAC Beginners Agility Program**

## **Purpose of Beginners Agility Tests**

The purpose of a NADAC Beginners Agility Test is to demonstrate the ability of the dog and its handler to perform many of the basic tests to prepare them for a future agility career. The dog should be under control at all times and show a willingness to work with the handler. Handlers should always conduct themselves in a sportsmanlike fashion.

## **Eligibility for Entry**

All healthy, trained dogs that meet the age requirements are eligible to compete in NADAC Beginners Agility test. A dog must be at least 12 months old for Level 1, 14 months old for Level 2 and 16 months old for Level 3. There is no leeway in the dog's age, even by one day; the dog **MUST** be a minimum of the required age on the day of the test in which the dog is to compete.

Dogs must be registered with NADAC prior to competing in a NADAC Beginners Agility test.

Bitches in heat, lame, or blind dogs are ineligible for entry, as is any dog with a deformity that may cause a judge to not be able to reasonably assess the dog's ability to function and perform agility obstacles safely, and in a manner that is in the best interest, health and welfare of the dog.

Any dog that demonstrates aggression towards any person or any dog, whether inside or outside the ring, must be excused from the Beginners Agility test.

Any dog that the tester feels is not in enough control to perform all obstacles in a safe manner will be excused from the test.

All NADAC Beginners Agility tests shall be open to purebred and mixed breed dogs.

## **Beginners Agility Testers**

The host club may select a "tester" that they feel holds the characteristics needed as an evaluator for these tests. This person should be an agility instructor or experienced person within the sport that has excellent canine evaluation skills so that participants are being tested in a safe environment. The tester should be able to set up the test sequences or approve the course if setup by someone else. The tester shall sign all qualifying reports.

# Beginners Agility - Level One

## Written segment - Level One – entry form

1. The entrant must write their dog's registration number in a correct format. (tester must verify that the number format is correct)
2. Entrant must indicate how tall their dog is and in which height group their dog would belong into. The dog need not be measured at this level and the height can be estimated. (tester should be able to guesstimate the probable height group the dog would compete within)
3. The entrant must list the breed of their dog or indicate mixed breed. (tester must not accept any "made up" breeds and a mixed breed should not be listed by the "mix" of breeds, such as BC/Aussie. It should just say "mix breed" or All American, etc but no breed should be listed unless it is a purebred.
4. The entrant must write in a manner that is legible for the tester to read clearly.

## Exercises – Level 1

All exercises will be timed and all exercises will be allowed one retry if the first attempt is failed. The entrant must pass all tests to receive a qualifying score. The handler may have treats in a closed bag or pouch or pack, but they may not withdraw treats to give the dog until all tests are completed.

1. Start line – This exercise is to demonstrate the handler's basic off lead control at the start line. There shall be a box at the start that can be a minimum of 8' by 8' to a maximum of 10' by 10'. Once the tester has said "good luck" the handler shall remove the lead and the handler and dog shall stay in box for 5 seconds after leash is removed. If the dog leaves the box, the handler may call the dog back into the box and retry the exercise. If the handler must leave the box to catch the dog, the exercise is failed. The handler has 60 seconds to complete this exercise. This time includes the time for a retry on the exercise. The dog may move around the box during the 5 second count, as long as they do not leave the box area. The box may be marked by PVC poles, corner cones or survey tape or any other such item that clearly delineates the parameters of the box area.
2. In and Out gates – This exercise shall show the handler's ability to guide their dog through a three sided box using commands to move the dog out away from the handler and back in towards the handler. The handler may choose which direction they go, either clockwise or counter-clockwise. Once they have started the exercise, they must maintain their original direction of clockwise or counter-clockwise. At the first gate, the handler shall indicate to the dog to go to the outside of the gate while the handler remains to the inside. (order shall be handler-gate-dog). After the dog has passed the length of the gate, the handler shall call the dog to the inside of the box and the dog shall pass the second gate on the inside of the box (order shall be handler-dog-gate). The dog should not come to the side of the handler that puts the handler closer to the gate than the dog. The dog shall pass closest to the gate on the second gate. At the third gate, the handler shall again cue the dog to pass to the outside of the third gate, as they did at gate #1. (order shall be handler-gate-dog). The handler shall remain on the

inside of the three sided box at all times. If the handler must leave the box to get their dog back, then the exercise is failed. If the dog misses one of the gates the handler may restart the exercise. The dog and handler have 90 seconds to complete this exercise, including one restart.

3. Two gate Figure Eight – In this exercise the handler will demonstrate the handlers ability to work the dog off both sides. The handler shall start in the middle between two gates, with the dog on the handler's left side. The handler shall send the dog around the gate on the right in a clockwise direction. As the dog completes the right side gate, the handler shall change sides so that the dog is now working off the right side of the handler. The handler shall send the dog off their right side around the left gate in a counter-clockwise direction. The handler shall do this exercise in one continuous motion. The team may have one restart if they fail to maintain the correct handling side. The handler and dog have 90 seconds to complete this exercise, including one restart. The same gate setup may be used for this exercise, with the middle gate removed.
4. A frame – With this exercise, the handler shall show the dog's ability to safely go up and over the a-frame. The dog may walk or trot. A frame set at a height of three feet or lower, depending on the construction of the a-frame. The handler may assist the dog by patting the a-frame or petting the dog to encourage them. The handler will have 60 seconds to complete the a-frame, including one restart.
5. Hoops – two hoops in a row 10-12' apart. In this exercise, the handler will demonstrate their ability to send their dog in a forward direction to two obstacles. There shall be two hoops in a straight line and the handler shall send their dogs through those two hoops in a continuous forward motion. If the dog goes around a hoop, they can restart the exercise from the beginning one time. The handler may move parallel to the dog as they direct the dog through the two hoops. The handler may NOT lead out and call the dog through the hoops. If the dog leaves the plane of the width of the hoops as they progress from hoop #1 to hoop #2, they may restart the exercise one time. The handler and dog have 60 seconds to complete the test, including one restart.
6. Tunnel and Recall – In this exercise, the handler shall show the dog's ability to go through a tunnel and be recalled back to the handler. The handler must send their dog through the tunnel and then as the dog exits the tunnel they shall call the dog towards them. If the dog continues away from the handler after the handler has called the dog, then the tester may fail the team if the tester feels that the dog is refusing to return to the handler upon command. The handler may step to the side of the tunnel while the dog is within the tunnel or travel ½ way down the length of the tunnel if desired to keep the dog from going back through the tunnel in the opposite direction. If the dog does not immediately return to the handler or returns via the tunnel, the handler may restart the exercise. If the tester feels that the dog is not under control, then the tester might not allow a restart of the exercise. The handler and dog are allowed 60 seconds to complete the test, including one restart.
7. Walk with distraction – 15' walk on leash w/ distraction. In this exercise the handler shall demonstrate that they have control of their dog with a nearby distraction of another person and their dog. The "distracter" and their dog are to be inside an ex-pen area or other secured area. The distraction person may have a chair to sit in if desired. The distraction person will interact quietly with their dog. Working dog must not approach distraction dog. The dog performing the

test should not pull their handler on a leash towards the person and dog secured in the pen. The handler shall walk their dog approximately 15' past the distraction person and their dog. If the working dog tightens the leash towards the distractions, they may restart the exercise one time, unless the tester feels that the dog is not under control while near the distraction. The handler and dog have 60 seconds to complete the exercise, including one restart. The 15' area shall be delineated by cones in the four corners. The leash walker shall hand the leash to the handler at the start of the exercise. The dog being tested should not jump on the leash walker, nor growl or act aggressive or overly friendly in any way towards the leash walker.

The handler is allowed to put the leash back on the dog in between exercises. If the handler already has their leash with them then the leash walker can just walk up to and past the dog and handler, on the handler's side of the team.

## Sample test setup for Beginners Agility – Level 1

<p>Note: The figure 8 test and the "In and Out" test can use the same gate setup and the tester can move the center gate in and out for the exercises.</p>

10	20	30	40	50	

## Sample test setup for Beginners Agility – Level 1 (long and narrow ring)

# **Beginners Agility - Level Two**

## **Written segment - Level Two – entry form**

1. The entrant must fill out an entire entry form with their dog's registration number in a correct format. (tester must verify that the number format is correct)
2. Entrant must indicate how tall their dog is and in which height group their dog would belong into. The dog should be able to stand and be measured without showing excessive fear or aggression towards the tester while being measured. (tester should be able to determine the height group the dog would compete within) The entry form should allow the handler to indicate what their dog's jump height would be in the Proficient division and what their height would be for the Skilled division.
3. The entrant must list the breed of their dog or indicate mixed breed. (tester must not accept any "made up" breeds and a mixed breed should not be listed by the "mix" of breeds, such as BC/Aussie. It should just say "mix breed" or All American, etc but no breed should be listed unless it is a purebred.
4. The entrant must write in a manner that is legible for the tester to read clearly.

## Exercises – Level 2

All exercises will be timed and all exercises will be allowed one retry if the first attempt is failed. The entrant must pass all tests to receive a qualifying score. The handler may have treats in a closed bag or pouch or pack, but they may not withdraw treats to give the dog until all tests are completed.

1. Start line – This exercise is to demonstrate the handler’s basic off lead control at the start line. There shall be a box at the start that can be a minimum of 8’ by 8’ to a maximum of 10’ by 10’. Once the tester has said “good luck” the handler shall remove the leash and the handler shall leave the box and precede 12-15 forward. If the dog leaves the box, the handler may return the dog back into the box and retry the exercise. If the handler cannot leave the dog, the exercise is failed. The handler has 60 seconds to complete this exercise. This time includes the time for a retry on the exercise. The dog may move around the box, as long as they do not leave the box area. The box may be marked by PVC poles, corner cones or survey tape or any other such item that clearly delineates the parameters of the box area. The dog shall remain inside the box area from the time that the handler removes the leash, walks forward to the marked area and then returns back to the dog inside the box.

Start line test - Level 2					
The handler shall leave the dog in the box and walk forward approximately 12-15'. At a signal by the tester, the handler may return to the dog.					
10	20	30	40	50	handler
30					30
20					20
10					10
10	20	30	40	50	start line box

2. Directional gate work – This exercise shall show the handler’s ability to guide their dog through a three sided box using commands to move the dog out away from the handler and back in towards the handler. The handler may choose which direction they go, either clockwise or counter-clockwise. Once they have started the exercise, they must maintain their original direction of clockwise or counter-clockwise. At the first gate, the handler shall indicate to the dog to go to the outside of the gate while the handler remains behind a line indicated by the course. (see diagram). After the dog has passed the length of the gate, the handler shall call the dog to the inside of the box and the dog shall pass the second gate on the inside of the gate. The dog may cross to the same side of the line as the handler. At the third gate, the handler shall again cue the dog to pass to the outside of the third gate, as they did at gate #1. The handler shall remain within the indicated area of the three sided box at all times. If the handler must leave the box to get their dog back, then the exercise is failed. If the dog misses one of the gates the handler may restart the exercise. The dog and handler have 90 seconds to complete this exercise, including one restart.

In and Out Gates - Level 2					
The dog shall perform the In and Out pattern as drawn (in either direction) while the handler stays within the handler designated area.					
10	20	30	40	50	
In/Out Gates					
30					30
20					20
10	dotted line is handler box area handler box is within approximately 2' of the gates the dog may enter the handler box while working the pattern				10
10	20	30	40	50	

3. Two gate Figure Eight – In this exercise the handler will demonstrate the handlers ability to work the dog off both sides. The handler shall start in the middle between two gates, with the dog on the handler's left side. The handler shall send the dog around the gate on the right in a clockwise direction. As the dog completes the right side gate, the handler shall change sides so that the dog is now working off the right side of the handler. The handler shall send the dog off their right side around the left gate in a counter-clockwise direction. The handler shall do this exercise in one continuous motion. The team may have one restart if they fail to maintain the correct handling side. The handler and dog have 90 seconds to complete this exercise, including one restart. The two gates used shall be part of the "in and out" setup, with the middle gate removed.

Figure 8 exercise					
The gates shall be a minimum of 15' apart and the dog shall perform a figure 8 pattern with a change of sides with the handler.					
10	20	30	40	50	
30	<p>Figure Eight</p>				30
20					20
10					10
10	20	30	40	50	

4. A frame – With this exercise, the handler shall show the dog’s ability to safely go up and over the a-frame. A frame set at a height of three feet to four feet, depending on the construction of the a-frame. The handler shall not assist the dog in any way to get them up and over the a-frame. The a-frame shall be preceded by a hoop and there shall be a hoop about 12’ past the a-frame. The dog should fluidly move from the first hoop, up and over the a-frame and onward to the finish hoop without leaving the obstacle area. The handler may stop the dog at the contact area before proceeding to the second hoop. The handler will have 60 seconds to complete the a-frame, including one restart.

5. Hoops – two hoops in a row 12-15’ apart. In this exercise, the handler will demonstrate their ability to send their dog in a forward direction and then change direction on command. There shall be two hoops in a straight line and the handler shall send their dogs through those two hoops in a continuous forward motion. After completing the second hoop, the handler shall call the dog back to the middle area between the hoops and send them back through the first hoop in the opposite direction as they started, turn tightly again around the first hoop and send to the second hoop in a forward direction (see diagram). If the dog goes around a hoop, they can restart the exercise from the beginning one time. The handler may move parallel to the dog as they direct the dog through the two hoops or they may lead out past the first hoop, but not past a point midway between the two hoops. If the dog leaves the “logical” working area of the exercise, they may restart the exercise one time. The handler and dog have 90 seconds to complete the test, including one restart.

Hoop test					
The dog is to follow the numbered test. They should go straight from Hoop 1 to Hoop 2 and then turn 180 degrees back towards Hoop 1 without going back through Hoop 1. They may turn in either direction. They will then go through Hoop 1 and turn another 180 degrees in either direction and go through Hoop 2 to complete the test.					
10	20	30	40	50	
30					30
20					20
10					10
10	20	30	40	50	

6. Tunnel and Recall – In this exercise, the handler shall show the dog’s ability to go through a tunnel and follow directional commands as given by the handler. The handler must send their dog through the tunnel and then as the dog exits the tunnel they shall call the dog towards them to two hoops on one side of the tunnel. After the second hoop, the dog shall be directed again through the tunnel and they shall turn the opposite direction of the first turn and go through the two hoops on the second side. The handler can choose which side is worked first and which side will be the second side worked. If the dog continues away from the handler after the handler has called the dog, then the tester may fail the team if the tester feels that the dog is refusing to return to the handler upon command. The handler may step to the side of the tunnel while the dog is within the tunnel or travel ½ way down the length of the tunnel if desired to keep the dog from going back through the tunnel. If the dog does not immediately follow the direction as given by the handler or returns via the tunnel, the handler may restart the exercise. If the tester feels that the dog is not under control, then the tester might not allow a restart of the exercise. The handler and dog are allowed 90 seconds to complete the test, including one restart.

7. Walk with distraction – 15' walk on leash w/ distraction. In this exercise the handler shall demonstrate that they have control of their dog with a nearby distraction of another person and their dog. The “distracter” and their dog are to be inside an ex-pen area or other secured area. The distraction person may have a chair to sit in if desired. The distraction person will interact quietly with their dog. Working dog must not approach distraction dog. The dog performing the test should leave the designated area during the off leash walk. The handler shall walk their dog approximately 15' past the distraction person and their dog. If the working dog leaves the designated area, they may restart the exercise one time; unless the tester feels that the dog is not under control while near the distraction. The handler and dog have 60 seconds to complete the exercise, including one restart. The 15' area shall be delineated by cones in the four corners. The leash walker shall hand the leash to the handler at the end of the exercise. The dog being tested should not jump on the leash walker, nor growl or act aggressive or overly friendly in any way towards the leash walker.

The handler is allowed to put the leash back on the dog in between exercises. If the handler already has their leash with them then the leash walker can just walk up to and past the dog and handler, on the handler's side of the team.

# **Beginners Agility - Level Three**

## **Written segment - Level Three – entry form**

1. The entrant must fill out an entire entry form with their dog's registration number in a correct format. (tester must verify that the number format is correct)
2. The entry form shall be the same type of entry form as is used for a NADAC trial entry, with all fields filled out correctly.

## **Working tests – Level 3**

All exercises will be timed and all exercises will be allowed one retry if the first attempt is failed. The entrant must pass all tests to receive a qualifying score. The handler may have treats in a closed bag or pouch or pack, but they may not withdraw treats to give the dog until all tests are completed.

1. Start line – This exercise is to demonstrate the handler's basic off lead control at the start line. There shall be a box at the start that can be a minimum of 8' by 8' to a maximum of 10' by 10'. Once the tester has said "good luck" the handler shall remove the leash and the handler shall leave the box and precede 12-15 feet forward. The handler shall then call the dog to them. If the dog leaves the box before called, the handler may return the dog back into the box and retry the exercise. If the handler cannot leave the dog, the exercise is failed. The handler has 60 seconds to complete this exercise. This time includes the time for a retry on the exercise. The dog may move around the box, as long as they do not leave the box area. The box may be marked by PVC poles, corner cones or survey tape or any other such item that clearly delineates the parameters of the box area. The dog shall remain inside the box area from the time that the handler removes the leash, walks forward to the marked area and then calls the dog to them. The dog must go directly to the handler when called. If the tester feels like the dog did not "recall" to the handler, they can ask the handler to repeat the exercise one time, if the team has not had a previous retry.
2. Directional work – This exercise shall show the handler's ability to guide their dog through a serpentine of hoops and gates using commands to move the dog out away from the handler and back in towards the handler. The handler may choose which direction they go, either from the left end or the right end. Once they have started the exercise, they must maintain their original direction of the serpentine. The handler must stay on the starting side of the serpentine and guide their dog back and forth with directional cues. If the handler must cross to the other side to get their dog back, then the exercise is failed. If the dog misses one of the hoops the handler may restart the exercise. The dog and handler have 90 seconds to complete this exercise, including one restart.

3-4 A frame–tunnel exercise. With this exercise, the handler shall show the dog’s ability to safely go up and over the a-frame, with an off course tunnel present. A frame set at a height of three feet to four feet, depending on the construction of the a-frame. The handler shall not assist the dog in any way to get them up and over the a-frame. The dog should fluidly move up and over the a-frame and then calmly stay with the handler for a count of four and then perform the tunnel upon command. The handler may stop the dog at the contact area before proceeding to the pause area. The a-frame and tunnel may “not” be performed in a single fluid motion. The pause between the two obstacles is mandatory. The handler will have 90 seconds to complete both obstacles, including one restart.

5. Tunnel and hoops exercise – In this exercise, the handler shall show the dog's ability to go through a series of hoop-tunnel-tunnel-hoop and follow directional commands as given by the handler. The handler must send their dog through the tunnel and then as the dog exits the tunnel they shall call the dog towards them and through the second hoop. If the dog continues away from the handler after the handler has called the dog, then the tester may fail the team if the tester feels that the dog is refusing to return to the handler upon command. The handler may travel ½ way down the length of the tunnel if desired. If the dog does not immediately follow the direction as given by the handler or returns via the same tunnel, the handler may restart the exercise. If the tester feels that the dog is not under control, then the tester might not allow a restart of the exercise. The handler and dog are allowed 90 seconds to complete the test, including one restart.
6. Hoop pinwheel with tunnel distraction – the handler shall direct the dog through a three hoop pinwheel as shown on the diagram. The tunnels from test 5 (hoop-tunnel exercise) shall be in view to the dog while the dog performs the pinwheel. If the dog goes excessively wide or too far towards the tunnels during the test, the tester may ask for a repeat of the exercise.
7. Honor exercise. At the completion of test #6, the handler shall bring the dog to an ex-pen area and shall stay inside the penned area with the dog while the next dog performs tests 1-4. The dog shall not lunge or pull on the leash while the second dog is working. There should not be any excessive barking or other signs of the dog being overly stimulated while the second dog is working. At any time that the tester sees or hears the honor dog being disruptive or overly stimulated, they may ask the dog to leave the ring area and the dog shall be failed for exercise #7.

The handler is allowed to put the leash back on the dog in between exercises. If the handler already has their leash with them then the leash walker can just walk up to and past the dog and handler, on the handler's side of the team.

**Level 3 test setup**

## **Rules**

All exercises are timed. The beginning of the time allowed will be indicated by the tester saying “good luck”. The handler may have food and/or non-audible toys on them during the tests, although they may not be used during the tests.

Handlers may have up to 15 seconds between exercises to settle their dogs or praise them. The dogs should still remain under control of the handler and not run away or wander away sniffing between exercises.

The tester may end the test and not allow for any additional exercises to be performed if they feel that the dog is not under sufficient control of the handler.

All Beginners Agility tests shall start with test #1. The tests numbered #2-#5 can be in any order, as set by the designated tester. The BA test must end with tests #6 and #7, in that order. Level 3 must end with tests 5-7 in that order.

## **Titles**

Once a dog has three qualifying rounds in a Beginners Agility, they will receive their title for that level. If two testers are available, then a club may allow for two test rounds per dog on the same day. If more than one test is being allowed on the same day, then each round must have a different tester.

If only one round is allowed per BA test, then the club can use the same tester at each test on subsequent days.

No more than two tests in a 48 hour period. So a club may have one test per day for two days, or they could have two tests in one day.

## **ADMINISTRATION**

Only NADAC Sanctioned Groups/Clubs may host a Beginners Agility Test.

Beginners Agility may be hosted as a stand alone event such as a class graduation test, or in conjunction with a regular NADAC trial.

An application to host a Beginners Agility Test is included with these guidelines.

The sanctioning fee is \$10.00 per class.

A sample entry form is included with these guidelines. This entry form may be included in the premium for pre-entry and is to be used as the written portion of Test 1 for Beginners Agility Level 1.

Sample Score Sheets are included with these guidelines.

The test score sheets are to be compiled and kept by the club for two months. All sheets are to be signed by the Tester.

Testers are paid \$1.00 per dog, per class.

An Excel file summary of the dogs who pass is to be e-mailed to Sharon at [NADACSharon@aol.com](mailto:NADACSharon@aol.com) within 5 days post test.

This file should include the following:

- Dog's jumping height
- Dog's NADAC registration number
- Dog's call name
- Handlers last name
- Level of test
- Pass or fail indicator
- Date of Test
- Tester's Name
- Name of Host Club

Recording fees in the amount of \$1.00 per dog, per class can be mailed to NADAC or paid via Paypal account [NADACSharon@aol.com](mailto:NADACSharon@aol.com)

## **AGREEMENT**

The person who signs this agreement represents that he/she is authorized to enter into this agreement on behalf of both exhibitor and the owner of entered dog. In consideration of acceptance of this entry:

1.1 As used here NADAC means North American Dog Agility Council, its members, officers, directors, employees, show chairs, show committees and agents.

1.2 Exhibitor/owner, agree to abide by the rules and regulations of NADAC and any other rules and regulations appearing in the premium for this event.

1.3 Exhibitor/owner certify that the entered dog is not a hazard to persons, dogs or property and that the entered dog's rabies vaccination is current in accordance with the requirement of the state in which the dog resides.

1.4 Exhibitor/owner acknowledge all hazards presented by the event and the event premises, including but not limited to, the condition of the floors, stairways, halls, lighting, security measures or lack of, electrical appliances, fitting, show rings, parking areas and the presence of unfamiliar animals and people; exhibitor and owner assume the risk of any harm arising from these.

1.5 Exhibitor/owner release NADAC (Including NADAC officers directors, employees and members), and will defend them and hold them harmless from all present and future loss, injury, damage, claims, demands and liabilities involving the entered dog, the event or event premises. Without limiting the generality of the foregoing hold harmless provisions, exhibitor/owner hereby specifically assume sole responsibility for and agree to indemnify and save aforementioned parties harmless from any and all loss and expenses (including legal fees) by reason of the liability imposed by law upon any of the aforementioned parties for damages because of bodily injuries, including death, at any time in consequence of my (our) participation in this event, howsoever such injury or death may be caused and whether or not the same may have been caused or may have been alleged to have been caused by negligence of the aforementioned parties or any of their employees or agents or any other persons.
