

# Pole Position Solo

- The Course Marshal will watch the dog run the course to ensure the correct path is followed.
- A dog is not Eliminated if it goes around the barrel in the wrong direction if the team corrects the mistake, then the team would only be using up their time on the course. If the team does not fix the mistake and goes on to complete the next obstacle, then the team is Eliminated.
- If this happens the CM will sound a whistle which indicates a NQ.
- Once the team is eliminated, they can continue until they finish the course as it is numbered, or maximum course time is reached. At this time, the CM is no longer required to monitor the course.
- Once the team has completed the correct 5-barrel pattern then any barrels the dog happens to take on the way to the finish are not called, the team would just be using up their time on the course.
